

Performance that doesn't cost the planet Pictet-Global Environmental Opportunities

As governments, businesses and individuals are compelled to develop a more sustainable economy, companies leading the way in the development of environmental services and products are set to thrive.

2019 was a year in which the damage inflicted on our environment by pollution or climate change was never far from the headlines. From plastic in the oceans to the more recent Australian bush fires, the challenges facing our planet are both daunting and undeniable.

The Pictet-Global Environmental Opportunities strategy aims to drive investor capital towards solving some of these issues, while aiming to deliver strong return to those self-same investors.

Pictet-Global Environmental Opportunities: transforming sustainable investment:

<https://www.am.pictet/en/uk/global-articles/2018/insights/equities/thematics/global-environmental-opportunities-introduction#overview>

“Growing awareness around environmental issues is creating opportunities for companies that can actively contribute to a cleaner environment and a less-resource-intensive economy.”

Luciano Diana, Senior Investment Manager, Pictet-Global Environmental Opportunities Strategy
